

Personnel Safety Net with WS70 Debris Liner

PSN with debris liners are fabricated using a two-ply construction method to join a 90 mm structural net underlay with a small particle debris net liner. The debris liner is attached to the border rope of the PSN with hog ring crimp fasteners.

The standard debris liner is InCord WS70 1/16 inch knit mesh. The raschel high density monofilament fiber is light weight, and is resistant to fabric tears. WS70 is recommended for small particle containment.

PSN netting is rated to withstand a minimum test force of 17,500 ft-lb. PSN is certified to meet the requirements of ANSI A10.11, the U.S. Army Corp. of Engineers, and all applicable OSHA safety rules and regulations when properly installed and maintained.

PSN#120x7 FR

Weight..... 0.0650 lb sq foot

WS70 Debris Netting

Weight..... 0.0358 lb sq foot

Snap Hook - 120 mm

Net Weight..... 0.422 lb (0.19 kg) each

Hog Ring Crimp Fasteners

Wire Gauge 15 gauge alloy wire
