

DROP FORGED CHAIN SHACKLES

Size, working load, and trademark are permanently marked on all shackles. All shackles and pins are heat treated. Loads are based on a design factor of 6 to 1. When tested all shackles are pulled at a uniform rate of speed in a direct tension.

- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.
- Material traceability available through Product Identification Code (PIC) System

Shackles Meet Performance Requirements of Federal Specifications RR-C-271F Type IVB* Grade A

WARNING:

Any deviations such as angular lifts, shock loads, modification of the basic forging, etc., will result in drastically reduced working load limits.

All types of shackles are available in a self-colored or hot galvanized finish. When ordering specify the size, finish, and type of shackle. Other rust preventative coatings are available on a special basis.

Bolt type shackles are of the same specifications as the regular types except for the bolt, nut and cotter.
