

## GTVK/S 1 / Clevis Master Set

With this assembly, there is no compromise when it comes to security. The chain is mounted directly into the coupling unit of the shortening element, thereby eliminating the need for an additional connecting link. The hook functions both as a connecting link and a shortening element, making for simple assembly and disassembly by a competent person, without the need for special tools.

This master set consists of a T/S Enlarged Master Ring and a welded-in VK/S Shortening Hook for the creation of Single Leg chain slings in the assembled system.

Code	Chain Size	WLL (lb)	Fits on single hook DIN 15401	Fits on double hook DIN 15402	e (inch)	d (inch)	t (inch)	w (inch)	Weight (lbs/pc)	Quantity per package
