

GTVK/S 4 / Clevis Master Set

The chain is directly attached to the captive coupling of the shortening element. This has the advantage, because there is no additional connecting element needed and the hook functions both as a connecting and a shortening element. The assembly and disassembly is done easily, quickly and without special tool by a qualified person.

This Quad Leg master set consists of a GT/S Master Link Assembly with four welded-in VK/S shortening hooks for the assembly of Quad Leg chain slings in the assembled system.

Code	Chain Size	WLL (90° - 45°) (lb)	WLL (45° - 30°) (lb)	Fits on single hook DIN 15401	Fits on double hook DIN 15402	e (inch)	d (inch)	t (inch)	w (inch)	Weight (lbs/pc)	Quantity per package
